PURPOSE

We help students learn by creating effective learning environments™.

Guided by our vision to help students learn better, we create effective environments to help prepare them for college, career and life. Our research-inspired furniture and applications increase student and teacher engagement, connection and well-being, while supporting the multiple ways teachers teach.

PRINCIPLES

SMART

- Research-inspired school products
- Environments that solve for today's problems and anticipate tomorrow's

AUTHENTIC

- Reliable products
- Respectful relationships
- Real commitment

FRESH

- Human-centered design
- Clean aesthetic solutions for learning and well-being

EASY

- On-time delivery
- Error-free products
- Best-of-class warranty
- Holistic, personalized services

PROMISE

We promise great performing spaces

We partner with you to ACE your space. We promise to provide products that support teacher and student activities, connections and engagement throughout the school.

ACE
THE [SPACE]

SUPPORT **A** ACTIVITIES
IMPROVE **C** CONNECTIONS
ENHANCE **E** ENGAGEMENT

Your world inspires us

A research pioneer, our founder Norwood Hubbell recognized the need for mobility in schoolrooms in 1955, so he started making furniture that was “fleet of foot.”

Continuing his legacy, we strive to gain insights that truly help students learn versus following the latest furniture fad. Using design thinking and human-centered design processes, we focus on understanding the entire educational ecosystem, so schools can create effective learning environments.

We dive into current concerns and educational trends. We observe classroom dynamics and interview key stakeholders including administrative leaders, educators, students and maintenance staff. Key findings lead to innovative new products and applications.

• **OBSERVING REALITY**

How can we help?

STARRT Your Success

As a school leader, you have a lot on your mind, and furniture probably doesn't top the list. But since it's more than 50% of a student's daily touchpoint, it really plays a key role in student and teacher success.

Understanding connections between your concerns and school environments inspire our furniture design and space planning work.

TOTAL COST MANAGEMENT

WHAT'S YOUR CHALLENGE?

Many students struggle to stay engaged. Causes include lack of sleep, hunger, boredom, home structure or social pressures. No matter the cause, academic performance suffers.

School leaders want to surpass core standards and engage students to maximize individual potential.

Teachers' success depends on student growth measurements, but classroom environments often stifle implementation of new teaching techniques taught in professional development.

Teachers face performance pressures, unfavorable staff/student ratios, physical strain, lack of resources, and physical classroom constraints, which can negatively impact their morale.

School leaders deal with absenteeism, drop-out rates, and school-to-school migration – impacting student counts and budgets.

Administrators must build school reputations that motivate parental involvement, incite community growth, foster business partnerships, and generate school bond approvals.

Schools face challenges providing safe physical, emotional and digital environments inside and outside of the school building.

Leaders must balance short and long-term facility needs with the immediate needs of students and teachers. Many furniture buying decisions are made to satisfy those immediate needs. However, the consequences of those quick decisions last for decades.

HOW WE HELP

Our research-based solutions help students stay alert, engaged and healthier by literally elevating the classroom via sit-to-stand options.

Our products facilitate the quality and quantity of student-teacher connections and flex to support how teachers teach now and in the future.

Good stuff happens in well-designed spaces:

- Great first impressions attract new students.
- Better engagement improves student performance.
- Superior results retain students.
- Teacher retention rates increase as student growth improves.

Our solutions make immediate visual impressions and empower academic results that build school pride.

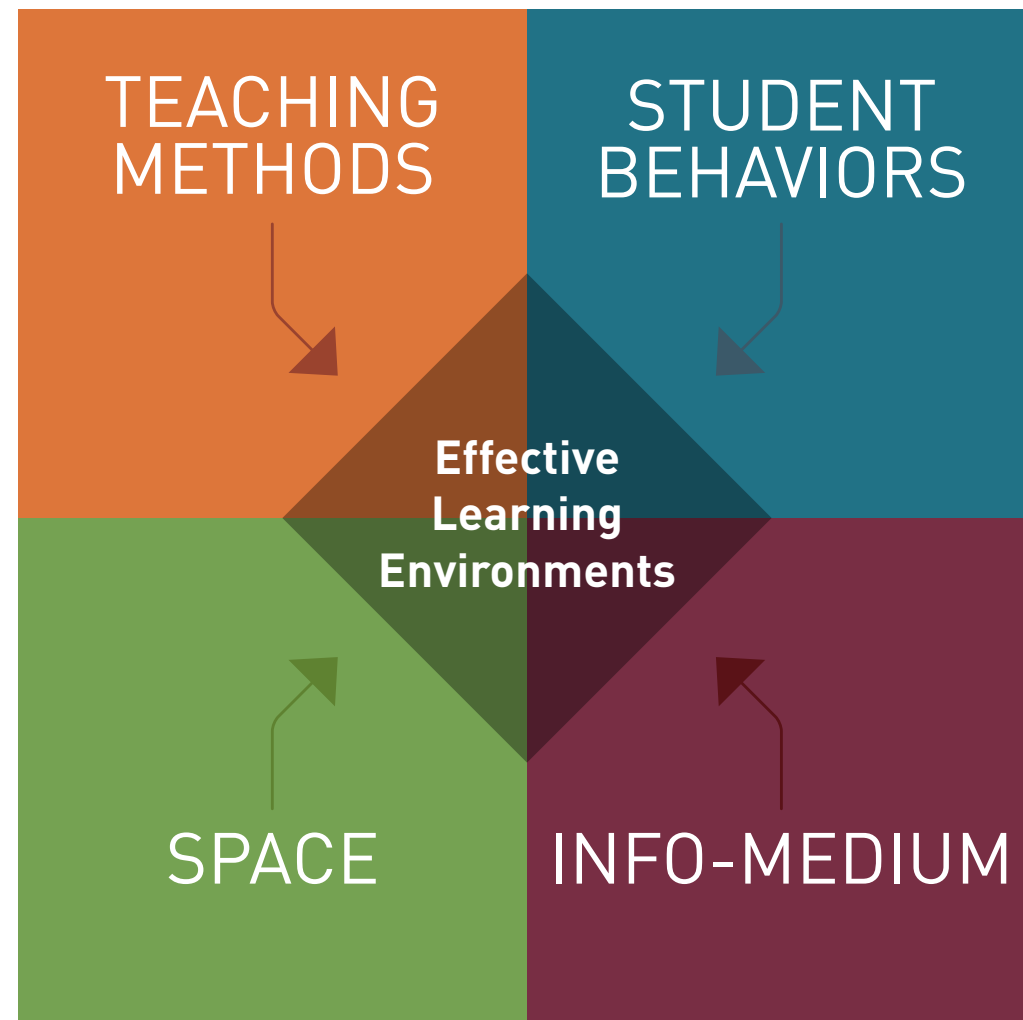

Ergonomics and durability are top-of-mind for us because student health and safety are paramount.

Our high-quality furniture is an investment – not an expense – that provides problem-free flexibility over a long lifecycle

Let space activate learning

Learning environments need to balance teaching methods, student behaviors, information-sharing mediums and spatial characteristics. Flexible space plays a crucial role in unleashing effectiveness in the other three quadrants.

Learning Environments Framework (LEF)

© 2018 Fleetwood

TEACHING METHOD

Flexible classroom design optimizes teaching methods and morphs as teachers modify spaces based on personal style, subject matter and students' needs. Whether lecturing, demonstrating, facilitating or personalizing your teaching method, you'll find proactively designed furniture easily adjusts to support teaching goals. Focus on mobile products that have simple, non-handed shapes for optimal flexibility.

Teaching methods:

STUDENT BEHAVIOR

As educators prepare students for the complex global society and economy, the 4 C's (creativity, communication, collaboration and critical thinking) become crucial for success. Obtaining these skills requires students to flex between working alone, in groups or all together. Look for products that enhance mobility, support a range of postures, and provide multipurpose solutions.

Student behaviors:

SPACE

Space design might translate into basic shapes like rows, u-shapes or clusters, but agile space unleashes the other three quadrants of the Learning Environments Framework. Intuitive, easy-to-use classroom furniture empowers spatial and tool organization, connects students and teachers, and stimulates learning, engagement and well-being. Key features like table and storage mobility, height-adjustability and multipurpose functionality become essential.

Classroom configurations:

INFO-MEDIUM

Today's students intermix low- and high-tech info-mediums whether working with other students or their teachers. Low-tech mediums include paper-based reading and writing, brainstorming and class discussions. High-tech mediums use laptops and digital displays. Flexible design is crucial. It allows students and teachers to move fluidly between interpersonal, analog and digital modes of communication whether working alone, in groups or as a class. Plan for sightlines, space division, light levels, storage adjacencies, visual displays, and power/data access to optimize info-medium dynamics.

Info-mediums:

• Our observations create better classrooms

To help students learn better, we strive to understand what happens in and around classrooms. In addition to secondary research, we dedicate resources to:

- Observe workarounds in existing classrooms using video-ethnography and photos
- Install furniture prototypes into classrooms to gauge behavioral changes
- Plan applications based on teachers' pain points
- Interview key stakeholders – like students, teachers, administrators, occupational and physical therapists, cleaning crews and installation teams.

The insights we gain drive product development, space planning, and services that impact all quadrants of the Learning Environments Framework so furniture can inspire both teachers and students.

TEACHING METHOD LEARNINGS

Futureproofing classrooms fosters flexibility

OBSERVATION: Project-based learning happens everywhere as more teachers adopt interactive teaching methods, but most furniture is designed for single-purpose lectures and static placement.

SOLUTION: Untie chairs from desks and make furniture multi-purpose by selecting mobile, adjustable-height furniture in basic shapes to guarantee effective spaces as educational techniques change – whether during a class, between classes or over time.

Learning stations require unique ecosystems

OBSERVATION: As young elementary students shift between small group, circle time, project work and individual learning stations; enthusiastic students swarm together organically with little regard for personal boundaries or protocol.

SOLUTION: Accommodate high-energy little bodies with multiple seating and horizontal surface options that match the current task to help students focus.

Ample circulation creates connection

OBSERVATION: Teachers gravitate to one area in their classroom because of the tight spaces created by condensed floorplans, unfavorable student/teacher ratios, or bulky and fixed furniture. This results in decreased mentoring and relationship building.

SOLUTION: Couple backless stools with smaller student desks or tables to open up aiseways for better flow and accessibility to individual students. At the same time, accommodate more students in smaller classrooms.

Elevating students aids teacher well-being

OBSERVATION: Teachers are kneeling, bending over, or looking down on students during one-on-one interactions which leads to either sore knees, backaches or unintended dominance.

SOLUTION: Place students at taller tables with stools to elevate students for more impactful eye-to-eye interactions and improved teacher well-being.

STUDENT BEHAVIOR LEARNINGS

Movement lengthens attention spans

OBSERVATION: Many students are disengaged in classrooms – evidenced by dazing, sleeping and passivity. Unfortunately, most furniture supports inactivity and detachment, which leads to poor academic performance.

SOLUTION: Solve with backless, non-handed stools. They naturally encourage student engagement, proper posture, movement and overall well-being. Core strength improves as slouching decreases. Blood flow increases through movement. Activity levels rise as sit, stand and perch positions emerge. Attention levels increase as bodies – not just heads – easily rotate to face changing focal points. Connection increases because students can't lean back and daydream.

Choice spurs focus

OBSERVATION: Placing young students in the same seat and same location all day makes it hard for kids to stay on task. Both bodies and minds scream for stimulation.

SOLUTION: When young students are in the same space all day, provide a variety of seating options, so students can choose what's right for them based on the task at hand – whether sprawling on the floor, kneeling, lounging in a beanbag, sitting around a table, leaning into a group activity, or standing.

Fidgeting produces positive results

OBSERVATION: Students distract other students when they fidget, but standard chairs don't address students' need to move. Introducing exercise ball-type solutions create other concerns.

SOLUTION: For middle schools and above, move from standard chairs and student-specific solutions, like exercise balls, to universal modulating stools. These support sit, stand and perch options and make fidgeting productive, while eliminating unique seating that stereotypes students.

INFO-MEDIUM LEARNINGS

Digital sparks team interaction

OBSERVATION: Videos broadcast to an entire class usually induce daydreaming or sleep – especially with the lights out, while electronic displays in small group settings stimulate interaction.

SOLUTION: Keep the lights on. Integrate technology tools like large monitors into individual and small-group environments to maximize digital learning effectiveness.

Analog isn't dead

OBSERVATION: In addition to high-tech solutions – laptops, tablets and digital displays; whiteboards, flip charts and other hands-on activities help facilitate creativity, communication and critical thinking.

SOLUTION: Equip classrooms with a blend of learning tools – both digital and analog – to stimulate effective and engaged group work.

SPACE LEARNINGS

Insightful furniture unleashes learning

OBSERVATION: Whether in a general classroom or makerspace, school furniture is subject to extreme use, abuse and repurposing.

SOLUTION: Focus on furniture that intuitively moves where students want to go, supports multiple teaching methods, lets teachers and students reconfigure classrooms, and supports multiple student postures and heights seamlessly.

Well-designed furniture eliminates headaches

OBSERVATION: Furniture can create distracting sounds, cause injury, break quickly under daily use, or become obsolete before its time.

SOLUTION: Look for solutions that muffle versus amplify distracting noise levels, eliminate safety hazards like pinch points and tipping, resist vandalism and misuse, and possess multi-purpose functionality.

THOUGHT STARTERS

Kindergarten to second grade

K2G.DEM.CMB.03

K2G.DEM.CMB.02

K2G.DEM.CMB.04

LEF Classification

- Design lower elementary classes so students move easily from station to station, but furniture stays in place to minimize chaos. Stimulate movement via posture and location changes to optimize focus and release energy. Furnish the room with multiple seating options so students can sit at tables, stand, lounge, kneel, or plop down on the floor during the day. Create ample space for storing personal items and school supplies throughout the room and implement color-coding where appropriate. Consider using more small, individual, adjustable-height tables to provide configuration flexibility long term.

THOUGHT STARTERS

Third to fourth grade

34G.LEC.ROW.02

34G.FAC.CLS.03

34G.LEC.USH.04

34G.PER.CMB.01

LEF Classification

- Build flexibility into mid-level elementary classes with individual mobile stacking student desks. Encourage students to move desks into multiple configurations to support project, individual, lecture, discussion or freeform activities. Furnish learning stations with various heights and shapes of tables and multiple styles of seating to improve teacher-student connections and prompt posture changes during the day.

THOUGHT STARTERS

Fifth to sixth grade

56G.FAC.CMB.02

56G.FAC.CLS.03

56G.DEM.CLS.04

LEF Classification

- Elevate student tables and seating to encourage alternating sit, stand and perch postures during the day to increase activity levels, student engagement and ultimately academic performance, while supporting the multiple activities occurring in upper elementary classes. Place students at group tables instead of in traditional row and column layouts to increase student connections. Consider stools featuring active seat mechanisms for all students. The resulting movement makes fidgeting productive, non-disruptive, and non-discriminatory. Because students are classroom bound in many cases, provide breakout areas with alternative seating.

THOUGHT STARTERS

Junior high/middle school

68G.FAC.CLS.02

68G.LEC.ROW.03

68G.DEM.CLS.04

LEF Classification

- Utilize a core group of adjustable-height tables across multiple subjects, but modify heights and configurations to tailor products for unique teaching methods and student behaviors. Set similar standards for storage, while making allowances for subjects that require more specialized storage. Selecting furniture with built-in flexibility makes buying and life-cycle management simple and flexible.

THOUGHT STARTERS

High school

912.FAC.CMB.02

912.FAC.CLS.03

912.FAC.CMB.03

LEF Classification

- Set up project groups, while enabling the flexibility to change teaching methods based on content and student needs. Pull small groups into alternative learning modes by rolling flip-and-nest tables into lecture rows or against the wall to create chair-based discussion circles. Enhance project-based interactions by providing access to digital group sharing tools in a section of the classroom.

912.LEC.ROW.01

THOUGHT STARTERS

High school

912.LEC.ROW.02

912.LEC.ROW.03

912.DEM.US.04

LEF Classification

- Design lecture-oriented classrooms for flexibility. Start by incorporating digital and analog displays, object storage, and individual work areas around the perimeter of the classroom. Within the main sitting area, consider adding a middle aisle to improve circulation. Also, set up equal numbers of table rows so students can easily turn around to face other students for spontaneous project work. Finally, put tables on casters so rooms can be reconfigured into a U-shape for presentations and discussions.

MKR.FAC.CLS.01

THOUGHT STARTERS

Makerspace

MKR.DEM.CLS.02

MKR.DEM.CLS.03

MKR.FAC.CLS.04

LEF Classification

- Encourage students to explore their creativity and critical thinking skills in a collaborative workspace via hands-on learning. While no two makerspaces are the same, incorporate areas that accommodate rugged hands-on activities and brainstorming with easy access to tools and bulk storage. Build in flexibility so your core makerspace furniture can morph as your school's vision evolves to meet students' career objectives and community opportunities.

THOUGHT STARTERS

Art

ART.DEM.CLS.02

ART.DEM.CLS.03

ART.FAC.CMB.04

LEF Classification

- Enrich students' creative thinking skills by constructing an environment that empowers hands-on problem-solving and communication skills. Support art generation with durable standing-height tables and digital media workspaces. Surround the work areas with modular sink, shelf, cabinet and tray storage units. Complete the space with mobile carts featuring power access to support various art tools.

MSC.FAC.CLS.01

THOUGHT STARTERS

Music

MSC.LEC.ROW.02

MSC.LEC.ROW.03

MSC.000.000.04

LEF Classification

- Instruments, sheet music and uniforms are visible and important parts of a band and concert music space. Create a culture that draws students to the space outside of class hours to build comradery, communication and collaboration skills. Move beyond stiff chairs with backs and incorporate simple ergonomic stool solutions that can move quickly between ensemble and sectional practice while saving space. Also, add in some incremental flip-and-nest tables to accommodate group gatherings.

SCN.DEM.CLS.01

THOUGHT STARTERS

Science

SCN.DEM.CMB.02

SCN.DEM.ROW.03

SCN.DEM.CMB.04

LEF Classification

- Cultivate science mastery by giving students first-hand learning experiences in theory, experimentation, data collection and analysis to enhance critical thinking skills in group environments. Create teaching demonstration areas visible throughout the classroom. Build workspaces large enough to accommodate physical materials and digital tools, and tough enough to resist abuse from chemicals and students. Surround the perimeter of the classroom with reconfigurable storage for easy access and long-term flexibility.

THOUGHT STARTERS STEM

STM.DEM.CMB.02

STM.DEM.CMB.03

STM.FAC.CMB.04

LEF Classification

- Studying math, physics, and chemistry to investigate technical careers, students learn creative, communication, collaboration and critical thinking skills as they apply academic concepts in a dynamic environment designed to reflect how practicing engineers work today. Multiple furniture settings support lecture and small and large project work activities.

CTE.FAC.CMB.01

THOUGHT STARTERS

Career & Technical Education (CTE)

CTE.FAC.CLS.02

CTE.FAC.CMB.03

CTE.FAC.CLS.03

LEF Classification

- Set students up for success by providing career and technical education spaces where they can develop in a variety of areas. Design the classroom to morph so it can support both the academic and technical hands-on training needed for postsecondary and workplace success. Create multiple types of workstations and provide plenty of room for object and tool storage.

THOUGHT STARTERS

Computer lab

CMP.DEM.ROW.02

CMP.DEM.ROW.03

CMP.PER.ROW.04

CMP.LEC.CMB.01

LEF Classification

- Rethink computer labs to accommodate individual, collaborative and social learning in a tech-rich environment that provides equitable access for all students and supplements classroom learning. Incorporate ergonomics throughout the space with adjustable-height tables, full-size keyboards and oversized monitors that support powerful processors, so students are equipped for the global job market.

THOUGHT STARTERS

Library

LBR.000.000.02

LBR.000.000.03

LBR.000.000.04

LEF Classification

- Create a vibrant, flexible library to establish a culture of life-long learning that goes beyond reading and independent research to support collaborative learning and creativity during and after school. Consider lower bookshelves to open up the space and provide staff visual access to students. Integrate multiple types of seating and tables to support team and individual projects. If possible, bring in plants and light to improve student well-being.

THOUGHT STARTERS

Commons

CMM.000.CMB.02

CMM.000.CMB.03

CMM.000.CMB.04

LEF Classification

- Nurture students' minds, bodies and spirits in a casual atmosphere that promotes community, balance and enriched learning featuring both low and high-tech touchpoints. Create a place where everyone feels welcomed and engaged by creating multiple spaces that promote choice – so students can focus on homework, work in groups, socialize with peers, or find respite.

THOUGHT STARTERS

Café/life center

CFE.000.000.02

CFE.000.000.02

CFE.000.000.03

LEF Classification

- Serve up multiple seating options in a café so it accommodates individuals, small groups or large groups fluidly either during the day or after school. Use mobile flip-and-nest tables throughout for easy portability and storage, and consider fixed standing-height options around the perimeter. Evaluate color-coded tables to aggregate groups or aid custodial staffs combining smaller tables into larger table configurations.

THOUGHT STARTERS

Teacher/faculty lounge

TFL.000.000.02

TFL.000.000.03

TFL.000.000.04

LEF Classification

- Make teachers' lounges work harder. Provide places to enjoy refreshments, relax individually, chat with peers, meet as large groups, and store personal belongings. Set up work areas so teachers can prepare lessons before class. Equip the space with sharable tools, like presentation carts and whiteboards, for easy access.

ADM.000.000.01

THOUGHT STARTERS

Administration

ADM.000.000.02

ADM.000.000.03

ADM.000.000.04

LEF Classification

- The administrative offices reflect the school's brand to the community. Determine the aura you want to project with space layouts, furniture selection and color palettes. At the same time, build in functionality to support greeting and controlling visitors, meeting with students and parents, training staff, and completing other school responsibilities.

Inspire learning with our comprehensive portfolio

60 TABLES & DESKS

Tables and desks play a bigger role in student and teacher success than ever before as project-based learning grows in prominence. Static is out, and movement is in. Fleetwood delivers with durable tables and desks designed to support multiple levels of mobility, height, compression, and reconfiguration. Can't find what you need? Call us for custom solutions.

114 SEATING

Rethink your seating solution. The traditional student chair may not optimize experiential learning and student well-being. Fleetwood's research with occupational and physical therapists points to elevating students to encourage multiple postures, eliminating chair backs to improve core strength, and supporting fidgeting for student achievement.

86 STORAGE

No longer just a built-in around the classroom perimeter, storage plays a vibrant role in project work. Storage creates easy access, divides space, and supports both analog and digital vertical collaboration with robust, mobile solutions outfitted for today's academic needs. Choose your look. Pick your price point. Fleetwood has you covered.

120 WHITEBOARDS

While digital displays grow in popularity, analog solutions – like whiteboards and flipcharts – also improve learning experiences and retention. Fleetwood's Pages system supplements groupwork by stimulating visual, verbal and writing skills.

• Tables and desks for your whole school

Fleetwood offers a coordinated collection of work surfaces large enough to support today’s school tools – usually laptops and 3-ring binders – while small enough to support condensed floorplans. Most tops are symmetrical allowing spontaneous reconfigurations between lecture and project work, and they can be supported with either fixed or height-adjustable legs. In addition, the desks and tables are extremely durable, featuring welded steel bases, pick-proof and moisture-resistant edges, and optional heavy-duty levelers or casters. Custom shapes and sizes available.

Unitized Frame

This table features a fully welded steel frame under the work surface perimeter that is connected to round or square legs. It stands up to a lifetime of classroom abuse, including being used as a seat or platform.

• **Work Surface Shape Options**

• **Height Options**

Wedge, Triangle and Delta in heights up to 32"

• **Size Options**

Widths from 27" to 84"
Depths from 20" to 48"

• **Mobility Options**

Levelers, Wheelbarrow, Casters

• **Technology Options**

Grommets, Wire management, Power

• **Application Options**

See Price List for work surface shape and size, mobility and technology combinations. Custom shapes and sizes available.

Stacker

Classrooms need tables but experiential learning also calls for open areas. To achieve both goals, integrate our fully welded steel stacking tables into your portfolio.

• **Work Surface Shape Options**

• **Height Options**

• **Size Options**

Widths from 27" to 54"
Depths from 22" to 27"

• **Mobility Options**

Levelers, Wheelbarrow, Casters

• **Application Options**

See Price List for work surface shape and size, mobility and technology combinations. Custom shapes and sizes available.

I-Leg

While four-leg tables meet most needs, sometimes aesthetics or function call for an I-leg solution, which increases the knee swing area under a top.

• **Work Surface Shape Options**

• **Height Options**

• **Size Options**

Widths from 40" to 72"
Depths from 20" to 30"

• **Mobility Options**

Levelers, Casters

• **Technology Options**

Grommets, Wire management, power

Application Options

Flip & Nest

Flip & Nest tables provide the perfect solution as teachers' needs for tables ebb and flows. Press the recessed activation bar at any point to flip up the work surface. Its multi-stop points prevent accidental pinch points. Roll the tables out of the way or use for vertical display.

• **Work Surface Shape Options**

• **Height Options**

• **Size Options**

Widths from 40" to 72"
Depths from 20" to 30"

Application Options

Crank Height Adjustable

When tables need to hold a lot of weight and students need to move their projects vertically to gain leverage or perspective, nothing beats the crank height-adjustable table’s performance.

• **Application Options**

Wood Leg

Science rooms have many traditions and nuances. Sometimes the classic wood frame table of the past is what’s needed to inspire the scientist of the future.

• **Work Surface Shape Options**

• **Mobility Options**

Levelers

• **Application Options**

Full End Panel

Full end panels on tables anchor a space and provide a sense of stability that attracts students. Standing-height large units create excellent gathering places, while narrower tops make great touchdown spots against walls or windows.

STORAGE

Sheerline

- Sheerline Collection boasts an industrial-style, urban aesthetic mixed with rugged performance that stands up to the most demanding classroom challenges, including science spaces. The line features visible, dent-resistant, welded steel frames around the perimeter. This dedication to durability also includes steel shelves and large, industrial casters that improve stability and mobility.

- Illusions Collection is a flexible alternative to built-in cabinets that can be installed in a fraction of the time. It reconfigures easily to meet evolving needs or moves to support summer deep cleaning. A perfect color-match to all Fleetwood furniture, cabinets feature hidden casters so units can be rolled into place, and then connected via a patented toolless interlock design. Once installed, sinks and plumbing may be added, and overhead storage mounted on walls.

SEATING

Rock Active Seating

- Rock stools elevate learning by encouraging body movement and student engagement. The patent-pending seat mechanism encourages a non-disruptive, front-to-back and lateral pivoting action that turns tired, distracted and fidgeting students into engaged learners. The sturdy stool's height, backless design, and gentle seat contours promote better blood circulation, improved posture, attentiveness and eye-to-eye interactions. Plus, the stable stool entices multiple stances – sit, stand, and perch, so students change posture more frequently to improve overall health.

Heights: 18", 22", 26"
Seat width: 13.5" rounded square
Oversized glides

• SIT

ROCK allows students to easily change positions between sitting, standing and perching for better well-being.

• STAND

Alternating posture between sitting and standing provides positive health benefits.

• PERCH

Rock's stable base provides a safe, non-disruptive solution for perching.

• PRODUCTIVE FIDGETING

The patent-pending seat mechanism encourages a non-disruptive, front-to-back and lateral pivoting action for better attentiveness.

• ROTATE

The non-handed, backless seat allows students to easily swivel as class focal points change.

• EYE-TO-EYE

Elevating students brings them eye-to-eye with teachers for improved interactions.

• ROCK PROVIDES MORE SEATED CIRCULATION SPACE THAN SEAT WITH BACK

Gain 6" in aisleway between rows with Rock so rooms feel less congested.

• ROCK OPENS UP MORE STANDING CIRCULATION SPACE THAN SEAT WITH BACK

Gain 21" in aisleway between rows when students stand because Rock easily tucks under tables. Teachers can freely move between project teams to facilitate learning.

• ROCK SUPPORTS COMPRESSED CLASSROOM FOOTPRINTS BETTER THAN SEAT WITH BACK

Rock's smaller scale allows tables to shrink which opens up floorplans.

SEATING Soft Rock

- Soft Rock adds to the Rock family by creating seating alternatives. Choose from a variety of fully upholstered soft seating solutions that range from floor cushions to multi-height casual stools that come with or without the patent-pending Soft Rock active base mechanism.

Floor cushion height: 3"
Stool heights: 12", 14", 16", 18"
Seat width: 15"
Styles: Fixed base or active base

PRODUCTIVE FIDGETING

Use Soft Rock with a fixed base or add our patent-pending active-base seat mechanism.

ATTENTION TO DETAIL

Detail stitching provides refinement.

Dual-density foam design optimizes comfort and stability.

Durable fabric is stain resistant and easily cleaned.

EASY MOBILITY

Use Rock light-weight floor cushions in reading stations or other floor activities.

MULTIPLE HEIGHTS

Pick the right height for your growing students and their activities.

Height	Grade
3"	K-4
12"	K-1
14"	1-2
16"	2-5
18"	5-12

SEATING Bean Bag

- If you want a more laid-back seating solution, check out the Rock Beanbag. It's built with a higher back to support torsos more effectively and holds its shape.

MULTIPLE BEAN BAG SIZES

Select the right size so students won't be swallowed up in over-sized bags or unable to move them quickly.

WxD	Grade
18"x18"	K-1
24"x24"	2-4
30"x30"	5-12

SEATING Bench

- In addition to complementing Fleetwood's picnic table, this sturdy welded-frame bench integrates into classrooms by lockers and learning stations or into commons, hallways or administrative waiting areas for a clean, easy maintenance solution that accommodates multi-age students.

WHITEBOARDS

Pages Dry Erase Marker Board System

- Pages Dry Erase Marker Board System takes collaboration to a new level with its multi-stacking, light-weight whiteboards that work individually or mount in multiples to mobile carts, cabinets and walls vertically or horizontally. The boards' magnetized corners and brackets easily click together or pop apart. Featuring durable high pressure laminate, the solution proves more environmentally friendly and economical over its lifecycle than paper-based options.

VERTICAL CARTS

Pages Vertical Cart with 4 panels

23 1/2" w x 60" h x 22" d

23 1/2" w x 42" h x .5" d
Graphite only

PAGES SYSTEM

The Pages system is comprised of lightweight dry erase panels, mobile carts, and hardware for mounting to walls or storage cabinets.

The Pages dry erase panels stack four deep and allow students and teachers to easily share ideas similar to peeling paper pages from an easel pad.

- Pages is less expensive and more environmentally friendly than paper self-stick easel pads.

We take great pride helping you make your school unique and appealing. Our newest standard laminates, paints and fabrics were carefully selected to provide fresh colorways that stimulate engagement. We also team with top surface material manufacturers to create your personal statement from their extensive standard palettes. Or, for functionality and durability, choose markerboard, phenolic resin or maple block options.
