

Transaction Desk System

Welcoming • Robust • Unified

This desk establishes a welcoming presence while reinforcing appropriate boundaries. Optional transaction counters and storage add functional space above and below the worksurface.

BUILD IT YOUR WAY

The modular system features multiple pieces that can be combined in many ways to create unique configurations and function. Plus, it blends beautifully with Illusions 2.0 for optimized work environments.

INTERACT OR FOCUS

The transaction counter encourages meet and greet activities, while the generous desktop supports digital and analog administrative uses.
