

CARE AND MAINTENANCE

CARE OF LAMINATE, METAL, PLASTIC FINISHES AND CHEMICAL RESISTANT PHENOLIC RESIN WORK SURFACE

Wipe product with a damp cloth to remove general soil and water-borne stains. If needed, use a nonabrasive, all-purpose cleaner suitable for hard surfaces such as Soft Scrub®, Windex®, Glass Plus®, Formula 409®, Fantastic®, or Mr. Clean® followed by a clean water rinse and dry immediately. Abrasive or harsh chemicals may discolor or mar the finish. Also, avoid abrasive cloths and sponges like Mr.Clean® Magic Eraser. Remove water spills immediately. Do not place heat producing items directly on laminate or chemical resistant phenolic resin surfaces as it may mar the finish.

CARE OF MAPLE BLOCK WORK SURFACES

Dust with a cloth slightly dampened with water. Clean tops with warm, soapy water and dry with rag or towel to remove any standing water on surface. Furniture wax can be applied periodically to bring back some of the luster which may be lost over the years.

Maple block is a natural material. Variations in grain and color are part of its natural character. Wood products will develop a beautiful patina over time which will modify its initial color. Exposure to sun will accelerate this process. Keep wood products at a relatively constant temperature and humidity.

CARE OF PAGES™ MARKER BOARDS AND WHITE MARKER BOARD SURFACES

Use non-toxic dry erase markers and microfiber clothes to erase. Clean the boards with soap and water only using a lint free soft cloth. Avoid harsh chemicals, especially ones that contain ammonia that will damage the finish.

CARE OF EDGE BAND

Use a mild liquid detergent. After cleaning, wipe the edges with a cloth dampened with warm water and dry immediately.

CARE OF FABRIC

SILVERTEX contains an antimicrobial agent. It is safe for diminishing odors and helps control bacterial growth. Cleaning instructions vary based on stain type.

GENERAL: Clean with damp cloth.

STAIN TYPE: Felt tip marker, crayon, chocolate, suntan lotion, hair/body oils. Clean with 1:1 mix of Ivory™ soap and water.

STAIN TYPE: Blood, urine, feces, oil-based paint, tar, asphalt. Clean with a 1:1 mix of ammonia and water, or a 1:4 mix of bleach and water.

STAIN TYPE: Other stains. Clean with a 1:1 mix of isopropyl alcohol and water. If stain persists, use straight alcohol.

Microsuede

Dab up spills as quickly as possible. Be careful not to rub the spill into the fabric. Hand wipes containing alcohol work well for spot-treating small accidents. Never get sections of microsuede too wet or water spots may occur.

Dry-clean microsuede by sprinkling it with a mild, dry laundry detergent. Rub the detergent gently into the upholstery with a scrub brush, and then vacuum.

Wash with a product made for cleaning microsuede, or use soap with a low ph balance, such as baby shampoo.

Don't get the fabric too wet—a damp, wrung-out cloth should work for applying and wiping away the soap.

Spot-clean stubborn stains with alcohol. Blot the area with rubbing alcohol with a clean white cloth or mist the stain with aerosol disinfectant and scrub.

Treat odor stains like urine quickly. Soak up everything you can with paper towels, then dab the area with vinegar.

Sprinkle the surface with baking soda and allow it to soak up the remaining moisture, and then vacuum. Spray-on odor removers can be used but mist lightly to avoid water stains.
