

Grow your grant with free furniture

Act before July 2021. Receive special your grant match for pilot classrooms.

Active students are engaged learners

Face it, today's students are sleep deprived, stressed, sedentary, and cellphone addicts – all factors that deter academic success. So how do teachers create the right environment to activate learning? The answer lies in physical movement, and Fleetwood's elevated classroom furniture platform delivers. When occupational and physical therapists test our portfolio, they rave about how the settings transform tired, fidgety and distracted students into engaged learners, while nurturing healthy physical habits.

Test it yourself

Encourage continuous motion with sit-perch-stand postures. Make transitions between team and individual work easy with tables on casters. Use standing-height tables and stools to bring students and teachers eye-to-eye for better interactions. And allow teachers to move easily between groups because of the stool's compressed footprint.

Double your grant dollars

Share your grant goals and dream classroom design. We'll help you discover the transformational power of elevated learning through our grant-matching program, which can equal up to 100% of your grant dollars. Call Jody at 616.820.8223

Photography by Sam Negan, Senior at Spring Lake High School

Students transition easily between group and individual work with mobile, standing-height tables.

Mobile storage divides space, promotes technology use, and supports brainstorming.

Students and teachers enjoy eye-to-eye interactions when seated, perching or standing.

Dry erase boards support student collaboration and classroom sharing

Improve blood flow, breathing and spinal health with Rock stool

SIT
Radius seat and foot rails support students and eliminate pinch points. Oversized glides prohibit tipping.

STAND
Stool enables quick posture changes that increase activity levels.

PERCH
Quiet, seat rocking-action improves posture and attention spans, making fidgeting productive and non-disruptive.

ROTATE
Non-handed, backless stool allows 360° pivoting - creating clear sight lines and eliminating awkward twisting.
