Montior Cart used as a way to collaborate. Students and Teachers can push content from laptops to Monitor for others to view.

Clear entryway allows students to safely enter classroom without crowding.

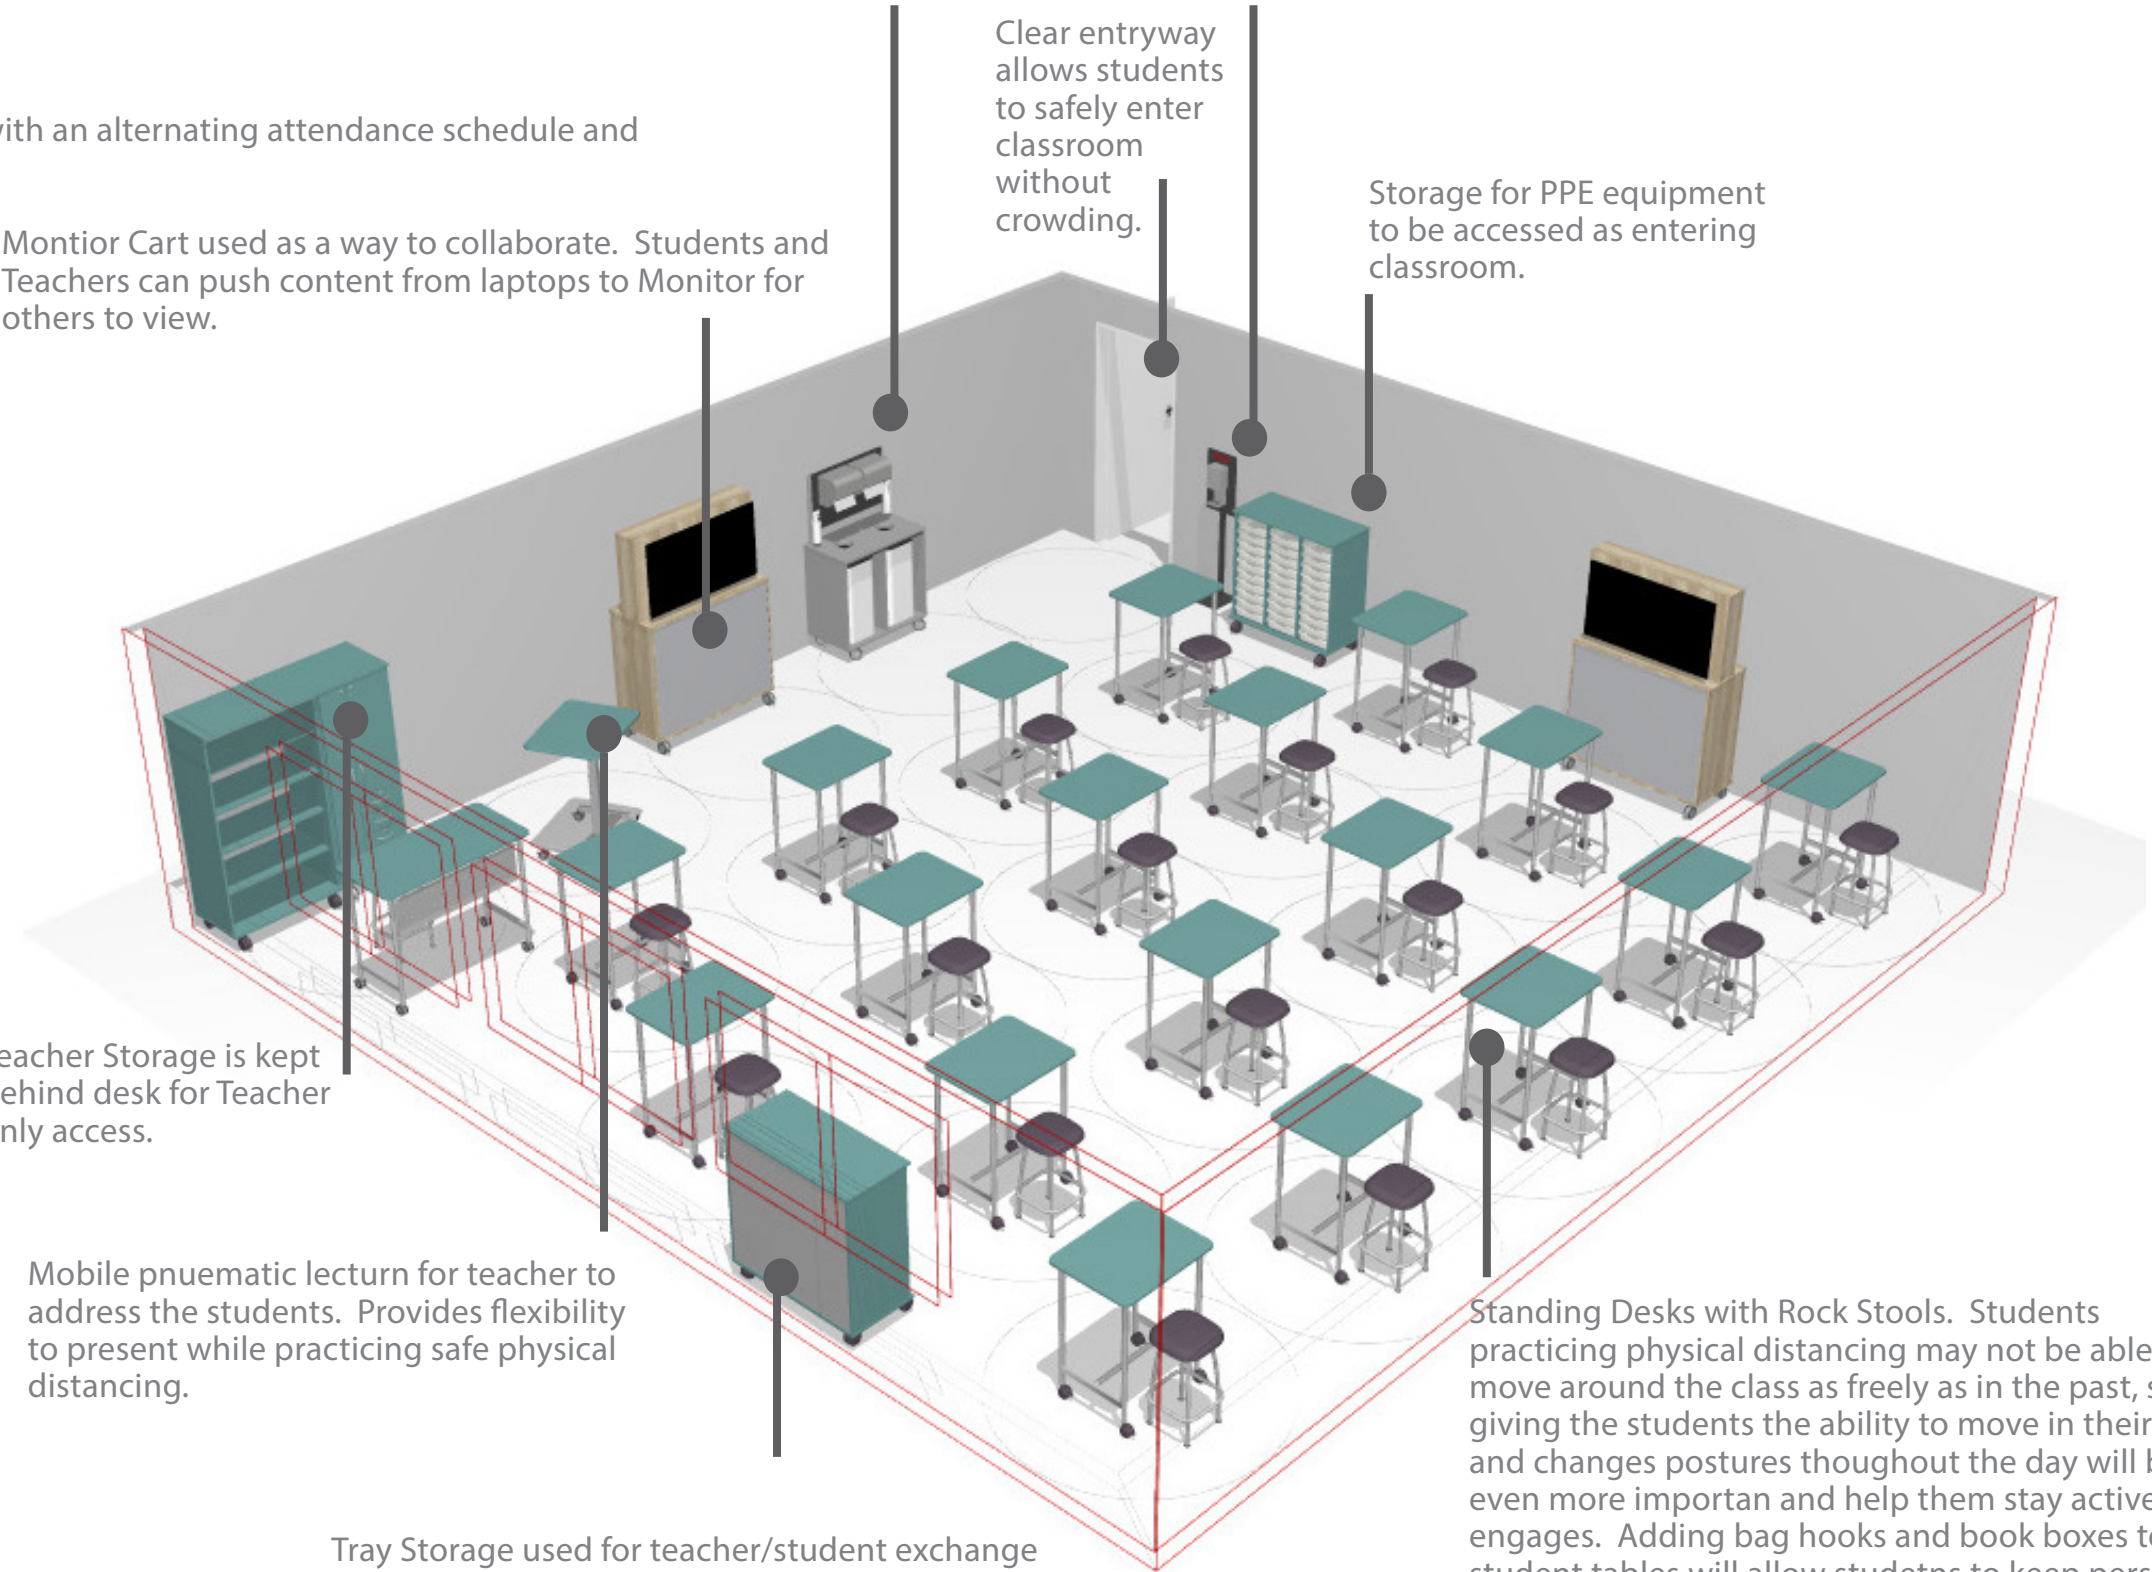

Storage for PPE equipment to be accessed as entering classroom.

Teacher Storage is kept behind desk for Teacher only access.

Mobile pneumatic lecturn for teacher to address the students. Provides flexibility to present while practicing safe physical distancing.

Tray Storage used for teacher/student exchange of materials, supplies etc.

Standing Desks with Rock Stools. Students practicing physical distancing may not be able to move around the class as freely as in the past, so giving the students the ability to move in their seat and changes postures throughout the day will be even more important and help them stay active and engages. Adding bag hooks and book boxes to student tables will allow studetns to keep personal items and school work near which will minimize tough points and eliminate the need for shared supplies.
